📍 : Pahlawan, Kutai Kartanegara, East Kalimantan.

Date of Birth : 09/22/2002

Gender : Male

Marital Status : Single

Nationality : Indonesia

I bring a background in data analysis and web development, with hands-on experience using Python, MySQL, Excel, Tableau, and Google Looker for data-driven insights, as well as Laravel, React, and Tailwind for building efficient web applications. My experience as a Laboratory Assistant has strengthened my analytical, problem-solving, and teamwork skills, while my role as part of the Election Committee (Division of Data and Technical) has enhanced my attention to detail, accuracy, and ability to work under pressure. Combining these experiences, I can deliver solutions that are not only insightful but also practical and user-friendly
